OHARA KENICHI**(54) CAPSULATED ENDSCOPE**

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a practical capsulated endoscope providing good workability regarding assembly and being miniaturized.**SOLUTION:** The capsulated endoscope, in which an object image formed by an objective lens under the illumination of an illuminating body is focused on an image sensor and an image signal produced by the image sensor is wirelessly transmitted, includes: an objective lens barrel for supporting the objective lens; a main block having both a lens holding tube for holding the objective lens barrel and an illuminating body supporting plate part being approximately perpendicular to the lens holding tube for supporting the illuminating body; and a jig insertion hole formed radially through the lens holding tube of the main block for adjusting the position of the objective lens barrel in the direction of the optical axis.**LEGAL STATUS**

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]
